

Far East Catchment

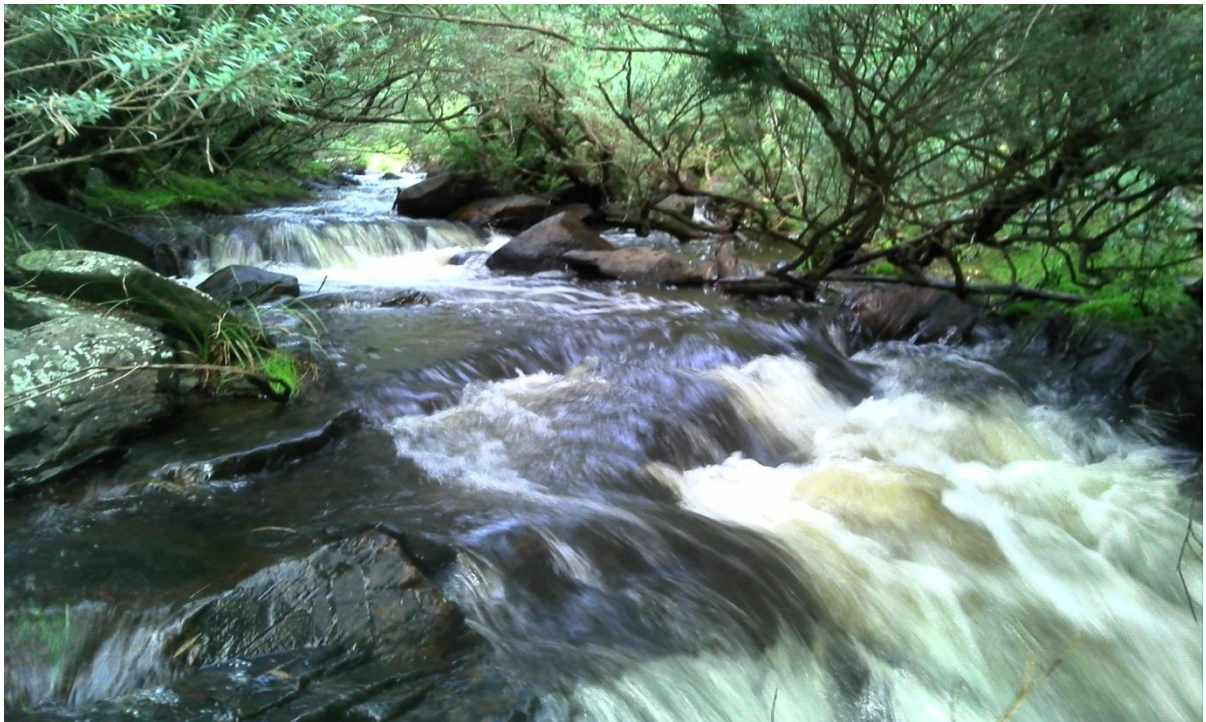

- Planting has been completed along three sites on the **Cann River** which complimented recent willow and weed control works.
- 15 ha of Willow control has recently been completed on the **Combienbar River**. This work was carried out as part of the long-term river restoration plan for the Combienbar River.
- 20 ha of non-woody weed control and 2 ha of revegetation has been completed as part of the ongoing **Combienbar River** rehabilitation project. This work was carried out to support previous investment in the Combienbar valley.

Snowy Catchment

- 38 ha of weed control has been carried out on **Martins Creek**, a tributary of the Brodribb River. This work has been carried out thanks to a grant provided to the East Gippsland Rainforest Conservation Management Network (EGRCMN).
- 19 ha of woody weed control has been completed on the **Buchan River**, upstream of the Gelantipy Road Bridge. This weed control was carried out as part of the long-term river restoration project for the Buchan River and supports revegetation and weed control that has been undertaken in previous years.
- An environmental works agreement has been completed on the **Buchan River**. This agreement includes 8.98 ha of protected river frontage and the installation of two off-stream watering systems.

Tambo Catchment

- No works to report

A hidden gem on the Nicholson River

Mitchell Catchment

- Revegetation along the **Dargo River** has been postponed until mid-September due to recent flood events and consistent river rises.
- Bank stabilisation, willow control and willow removal works have been completed on the lower **Mitchell River**.
- Weed control and revegetation works have been completed on the lower **Mitchell River**. These works complemented the previous bank stabilisation and willow control works.
